Edge Ecosystem

Enterprise-ready B2B platforms - CRM - Automation - Integrations

What we build

- Platforms & CRM: portals, RBAC, workflows, approvals, dashboards

- Automation & integrations: API-first, bots, ETL, payment flows

- Reliability: CI/CD, observability, runbooks, release discipline

Engagement model

- Pilot MVP in 2-6 weeks: one metric + demo + decision artifact

- Monthly retainer: roadmap + continuous delivery + measurable outcomes

- Productize: license / white-label best modules to adjacent companies

Transferable packaging

- Assignable contracts and clear deliverables

- IP owned by the LLC: repos, licenses, access control

- Monthly reporting + dataroom readiness for banks, investors, M&A

Enterprise readiness

- Security: least privilege, audit logs, secrets hygiene, secure defaults

- Operations: monitoring, backups, incident playbooks, predictable releases

- Procurement: documentation, traceability, clear scope + SLA

Proof (selected real cases)

Audit-safe, factual mini-cases (anonymized). Before -> Shipped -> Outcome.

- Case #1 - Marketing CRM MVP: fragmented tools -> CRM MVP with pipeline, roles, reporting -> demand validated + rollout plan

- Case #2 - AI media workflow: manual ops -> AI-assisted workflow with automation & review gates -> faster turnaround

- Case #3 - Fleet ops UI: inconsistent UI -> unified frontend + stable releases -> clearer operational control

Next step

Fastest path: send a 60-second brief or book a call.
